Good Morning Counsel,

I am writing with the hopes of resolving this matter without the need to continue litigating this case. Plaintiffs simply seek transparency, which, the Michigan Democratic Party should be interested to provide. If the MDP will produce the following, Plaintiffs *will* voluntarily dismiss this lawsuit:

1. The raw data from the VOATZ app as it was provided to the MDP immediately after the vote closed, at 4:39pm on Saturday, August 24, 2024, including timestamp and geolocation from where the vote was cast.
2. A list of the MDP members who were properly credentialed to vote by 2:00pm on Saturday, August 24, 2024

Both of these items are straightforward and easy to produce. They will help us understand and rectify the discrepancies in the voting data that was provided to Arraf by Lavora Barnes on August 25, 2024. This data is discoverable and will be requested during discovery anyway, so there should be no harm in producing it now.

Please advise. Thank you
